Summer Risk Management & Networking Series 2018

1 employee + 1 e-mail click + a couple of bad IT decisions = \$292M in Cyber Cost To Date!

Design Professionals are not immune to cyber liability exposures. We will look at real claim cases and claims data as part of this presentation. By the end of the discussion you should be able to better answer the following:

- What are the general and particular cyber threats that architects and engineers face when doing business in 2018?
- Is having a supplemental Network Security or Privacy Liability as part of my Professional Liability coverage enough protection for my firm when it comes to cyber risks?
- What can I expect when I when I have a claim?

Legislative Update for Design Professionals:

Allow two of our local construction law expert attorneys to bring your staff up to speed on national and local court cases impacting the design industry. Understand lessons learned from these cases in order to further develop strategies for managing your firm's risk.

Q&A

Take advantage of having our experts in the room! Submit a question, along with your registration form, that you would like to have addressed during our closing Q&A session.
