A half day seminar for Architects, Sustainability Experts, and Building Owners to learn about Metal Roofing as a Sustainable Option. In lieu of roof replacement, or even in new construction, metal roofing can be the best sustainable option for roofing. Hear from leading industry experts and experience an actual installation mock-up that fully portrays the economic, sustainable and aesthetic benefits of metal roofing. Lunch will be provided.

Guests will earn a total of 4.5 AIA CEUs with HS&W credit.

AGENDA

8:00 am – 8:30 am	Registration, Table-Tops, Networking, Light breakfast buffet
8:30 am – 9:30 am	The Evolution of Standing Seam Metal Roofing <i>Presented by Richard Cass of McElroy Metal Roofing</i>
9:30 am – 10:30 am	How to Recover an Existing Sloped Roof Using a Structural Standing Seam Roof System <i>Presented by Richard Cass of McElroy Metal Roofing</i>
10:30 am – 10:45 am	Break
10:45 am – 12:00 pm	Metal Roof Retrofit Installation demonstration - Triple AAA Roofing
12:00 pm – 1:00 pm	Working Lunch – Proper Use of Sealants <i>Presented by Jason Cronkright of Tremco Commercial Sealants & Waterproofing</i>

Learning Outcomes:

- Understand the different types of metal roofing, and when and how to specify the different systems
- Identify the different roof scenarios where metal roof recovery can be used in place of roof replacement
- Identify how to properly detail a structural seam metal roof when used as a recovery solution.
- Discuss the sustainability benefits of metal roofing when used as a retro-fit solution
